Weapons Identification Guide

An essential training aid for your frontline staff

According to FBI statistics, U.S. financial institutions face the frightening and unnerving prospects of robbery more than 6,000 times per year. Approximately one out of three bank robberies involve the use of a weapon. The National Association for Bank Security, in cooperation with Profit Protection, LLC, is pleased to present a new tool in the fight against this insidious crime, the *Weapons Identification Guide*. Filled with illustrations and useful information about common weapons, this Guide is designed to help staff before, during, and after a bank robbery. Developed in response to many requests from financial institution security specialists and users of our companion financial industry standard *Robbery Assignment Kit*, the *Weapons Identification Guide* adds yet another dimension to robbery deterrence training and preparation. The Guide features:

- A flipchart in a convenient 8.5 by 5.5-inch format on heavy cardstock designed for long life and frequent use. Available in both top and left side spiral bindings.
- Illustrations and descriptions of 39 types and styles of

weapons often used in bank robberies;

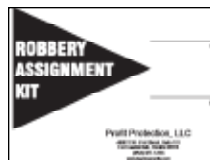

- Grouping of weapons into three categories: handguns, rifles/shotguns/assault weapons and knives. Each grouping is color-coded to facilitate learning and sharpen observational skills.
- An effective tool to assist security officers and branch managers with awareness training of the front line staff so that they will become familiar with a variety of weapons and further enhance their observational and recognition skills.
- An invaluable aid for debriefing staff and other witnesses in the event of a robbery.

Order your copy of this new and essential element of your robbery preparedness and response plan today! Available separately for only \$24.95 or as part of our new Robbery Bundles. Indicate top or left side binding when ordering.

Robbery Assignment Kit

Procedures for employees to follow immediately after a robbery - this kit reduces it all to writing, in a simple, easy-to-use format that trusts nothing to memory. The kit includes a robbery response pamphlet containing administrative procedures for supervisors and branch managers. It also includes eight robbery assignment cards containing procedures for tellers and other personnel to implement before, during and immediately after a holdup; two perforated cards which divide into six panels each detailing specific teller and staff robbery security procedures; a pad of bandit description forms on which employees and customers can record their observations; and one evidence bag. Order 15 or more kits and receive FREE one multi-color height marker and a laminated closed sign.

Caution Tape

Use to secure the crime scene after a robbery. (300-ft. roll)

Color Height Marker

Unique color coding makes it easier for staff and customers to determine the height of the perpetrator. Ultraviolet coating to protect from fading. Easy to mount, peel and stick.

Laminated Closed Sign

Two color door sign laminated for repeated use. Customizable for banks or credit unions.

Videos:

Avoiding Morning Glory Robberies

Motivate your employees to implement effective morning opening procedures. This video gives your employees the ability to deter 'morning glory robberies,' those robberies that occur early in the morning before a banking office opens to the public for business. It discusses the seven most common techniques used by criminals to perpetrate these kinds of robberies and provides easy-to-implement procedures to combat these dangerous crimes.

Bank Robbery

A financial institution's security program must, "provide for initial and periodic training of officers and employees . . . in proper employee conduct during and after a robbery. . ." Since employee robbery training is of vital importance in today's environment, especially for safety considerations, it is imperative the training materials must be as comprehensive as possible. This 20-minute video includes all the points that need to be covered in robbery security training. This video covers how robberies occur, the robber's mindset and what the robber's goals are. Also, teach your frontline staff how a teller can reduce the odds of being a robbery victim, how to safely deal with robberies and how to be helpful to law enforcement in their investigation.

Teller's Choice Interactive

This informative CD requires viewer interaction. It is formatted to provide flexible, effective robbery training. One or more trainees can be involved in selecting options and it is designed to fit your training schedule - it can be viewed in its entirety at a single session or in multiple sessions as time allows. Each CD includes a list of robbery security principles to be used as handouts for trainees. The set contains an introduction covering the robbery principles and six robbery scenarios that can be played out, each containing a few different actions and reactions. Some outcomes are good; others are not so good. To enhance this learning experience, a critique follows at the end of each scenario. This is a different training concept we think will add to your robbery training sessions. (CD)

Complete Robbery Bundle! Save Over \$150

Absolutely everything you, your staff and your institution need to prepare for, survive and respond to a robbery. Purchased individually, these items would cost over \$1,000. See descriptions of individual products in this catalog.

Bundle price \$ 850.00

Burglary Alarm Response Procedures

This 15-minute video is specifically designed for viewing by bank personnel on the bank's burglar response contact list. It details the safety procedures employees should follow before leaving their homes at night in response to a burglar alarm at their banking office and procedures they should follow upon arrival at the bank.

Holdups: A Staff Training Program for Robbery Security

Under the Bank Protection Act regulations, boards of directors must ensure that officers and employees receive initial and periodic training. This quality video goes beyond the compliance aspects of these regulations, providing the kind of visual experience that employees best retain from training. Calmly but dramatically, this 20-minute video provides employees with an understanding of the most common techniques used by bank robbers and the procedures generally recommended by security professionals for before, during and after a robbery.

Safety after a Robbery

A bank robbery often generates a great deal of conflicting and confusing emotions in employees. It creates an environment in which rational people sometimes do irrational things. Such actions may jeopardize the safety of employees and customers. While this 19-minute video contains generally recommended security procedures for employees to follow during and after a robbery which may aid law enforcement identify and apprehend the robber, the most important aspect of this training video is its focus upon measures after a robbery that impact employee safety.

Think Security

This video training program provides staff familiarization and orientation on the following security matters:

- The Bank Protection Act and how employees fit in.
- The board of directors' and security officer's responsibilities in the security program.
- The federal regulations covering employee dishonesty and the institution's reporting requirements.
- Generic emergency preparedness practices, procedures, and their importance to employees.

Added Bonus - the 45-page Employee Security Handbook. (See below.)

Employee Security Handbook

This 45-page manual contains everything an employee needs to know about financial institution security. Excellent for inclusion in a new employee orientation kit. Cover can be customized for your financial institution for an additional cost. Inquire when you place the order.

Branch Robbery Readiness Bundle! Save Over \$15!
