Enterprise Risk Management: A Framework for Managing Risk, Controls and Performance

Understanding the many facets of risk in today's financial services arena is a key concern for bank management and boards of directors. Increasingly, regulators are holding bank boards of directors and management accountable for the quality of the bank's risk management program.

This year's workshop will combine expertise from the regulatory agencies – Federal Deposit Insurance Corporation, Office of the Comptroller of the Currency and Office of Thrift Supervision – and interactive discussion to explore effective ways to identify, measure, monitor and control risks.
